

Restart Education at SERC

Develop new skills and support
your child's learning

South Eastern Regional College (SERC) would like to help you seek a fresh start in education. Now that the children are back to school, it is time to consider your own education.

Whether you want to retrain, change careers or simply help your children to learn, we are able to help you regardless of your circumstances or educational background.

Our **FREE** Restart Programme could be the option for you.

As you build your skills in literacy, numeracy and science, you will develop the confidence to allow you to support your child as they learn at school.

We understand how daunting it can be to come back to education, but we can help you take that first step.
